

NCR CONFIGURATION CENTER

EASILY MAKE DATABASE CHANGES TO MULTIPLE SITES
FROM ANYWHERE

REMOTELY ACCESS YOUR SITE SYSTEMS AND PERFORM UPDATES AUTOMATICALLY

NCR Configuration Center is a centralized database management application that allows for Aloha POS configuration settings for multi-store restaurant organizations. It offers remote distribution and access capabilities through an easy-to-use .NET rich-client interface.

Access your configuration data from anywhere

NCR Configuration Center provides secure access to your hosted configuration data from any location. Network administration, data backup, server software and hardware maintenance are managed for you, allowing you to focus on your business.

Control your data with security roles and permissions

A single point of administration can be accessed from anywhere with the confidence that a redundant infrastructure is consistently backing up your menus, labor, taxes and other corporate data.

Distribute data automatically and perform real-time updates

Easily update menu items, price changes or POS configurations across multiple sites automatically. NCR Configuration Center enables administrators to manage and schedule changes to the database in multi-site environments using an automated distribution process.

KEY FEATURES

Invest in efficiency

Access your NCR Configuration Center database from virtually any computer at a fraction of the cost of doing it yourself.

Rich, easy-to-use interface

Intuitively designed for the novice user with a rich set of advanced features and tools for the power user. The new 'grid view' style of each function screen keeps your data visible when you add or edit records in the application.

Offline mode capability

If connection to the hosted database is temporarily lost, all functions are available offline and any changes made are automatically synchronized when connectivity is restored.

Data integrity and recovery

NCR Configuration Center keeps corporate and store data synchronized at all times to allow for consistent reporting and effective systems management. Your configuration data is protected by automatic backup and disaster recovery support enabled by a robust data center infrastructure.

Built-in security

Multiple layers of security ensure that your data is protected. Role-based user security and record-level data security prevent individual users from accessing designated areas. You have complete control over which types of data can be viewed and/or edited by each user.

Automatic application upgrades

NCR Configuration Center checks for available upgrades each time it starts up. If a version upgrade is available, the system will download the new store client files and apply them.

WHY NCR?

NCR Corporation (NYSE: NCR) is a leader in omni-channel solutions, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables nearly 700 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Atlanta, Ga., with over 30,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
